Brief Overview:

Newland is proud to present the first model of its ecofriendly future forward product line. The brand new Newland HR1250-70 handheld barcode scanner incorporates the latest Newland 1D decoding chip technology for excellent 1D barcode scanning performance at exceptionally low power consumption. The HR1250-70 can perform up to 300 scans per second, which translates into very fast and accurate barcode capturing. In addition, its compact size, ergonomic and solid state design makes a smart solution for extensive use in varied environments. The HR1250-70 is a practical no frills, user friendly quality entry level scanner at an extremely competitive price.

Features:

Ergonomic Design

The relatively small design of the HR1250-70 (163.0 x 68.4 x 58.5 mm L x W x H) combined with the low weight (130g with USB) and solid state design makes for a reliable and easy to handle scanner.

Superior decoding performance

Delivers speedy and accurate(built-in laser aimer) scanning performance and supports most 1D barcode symbologies

Ecofriendly

Newland's HR1250-70 operates on 55mA±5mA current only. This means increased energy savings and an ecofriendly business solution.
