

BIP-1530

Mobile Computers > All In One Rugged Handheld Computer

Same story of the BIP-1500 goes to BIP-1530. The only difference is, the printer size has increased from 2" to 3". The BIP-1530 fully supports flexible payment schemes, barcodes, printers, NFC, and finger print scanner. As an extremely rugged yet useful mobile computer, the level of durability has been enhanced with high level of water-dust resistance and drop endurance. The PCI PTS 3.X certification puts up a solid stonewall level of security against any attempts of intrusion. Last but not least, the BIP-1530s are crafted for convenient maintenance as well. Maintaining the same level of excellent performance and utility, the BIP-1530 is the right device to serve e-ticketing and e-citations.
