

# Star cloudPRNT

Cloud Printing for TSP654II, SP700, TSP800II, TSP700II

## Grow Your Business with Star cloudPRNT for Online Ordering Systems

Star Micronics introduces cloudPRNT, an innovative technology, enabling users to print to Star printers directly through a cloud service. The cloudPRNT printer retrieves and prints orders from any online ordering service, integrating Star's communication protocol.

cloudPRNT will work with the online ordering service to store and create print jobs, and communicate status with the printer. Cloud ordering services will post orders, using a JSON format while the Star cloudPRNT printer will pull these orders on a defined interval.

Star's cloudPRNT technology provides benefits to both restaurants and retail stores by eliminating the need for an extra tablet to send online orders to the printer. Instead, the ordering service is able to communicate directly with the printer. Also, store owners or service providers do not need to maintain a SSL certificate for the cloudPRNT printers since they communicate with the server as a client.

By offering online purchasing options, retail stores and restaurants will be able to grow their business to expand to a larger market. Using cloudPRNT, online ordering systems have a new and easier solution to offer businesses, allowing them to seamlessly integrate online purchasing into their stores.

### Product Highlights

- cloudPRNT printer communicates with your server directory
- The server can control peripherals connected to the printer
- No need a tablet and software for the printer at the local environment
- Multi-interface supporting POS (native) & online ordering systems (cloud)

### Use in Hospitality & Retail:

*Restaurants | Pizzerias | Quick Service  
Gift Shops | Apparel Stores*

Paper Width:	80mm / 58mm	9 pin impact dot matrix 70mm (standard) / 58mm	80mm / 58mm	Direct thermal 112mm / 82.5mm/80mm
Paper Thickness:	0.053 – 0.085mm	0.06 - 0.08mm	0.06 - 0.15mm	0.06 - 0.15mm
Resolution:	203 dpi (8 dots/mm)	203 dpi (8 dots/mm)	203 dpi (8 dots/mm)	203 dpi (8 dots/mm)
Speed:	60 RPM (300mm/s)	13 RPM (4.7 line/s)	48 RPM (250mm/s)	37RPM (180mm/s)

#### cloudPRNT SERIES FEATURES

StarPRNT SDK for iOS, Android & Windows; cloudPRNT for server printing; WebPRNT for browser printing

#### cloudPRNT SERIES CONNECTIVITY

USB-B for POS system ; Ethernet for cloudPRNT or WebPRNT; USB-A(2 ports) for WLAN dongle and peripheral; DK-port for cash drawer or buzzer

#### cloudPRNT SERIES SOFTWARE SUPPORT

Printer driver for Windows, Mac OSX & Linux; JavaPOS; OPOS; StarPRNT SDK for iOS, Android and Windows; WebPRNT SDK for JavaScript; cloudPRNT protocol for JSON
