The Industry's Smallest Embedded UHF RAIN® RFID Module

ThingMagic M7E-PICO is the smallest form factor for a Mercury Series embedded UHF RAIN RFID module. With very low power consumption, it is ideal for battery-operated, low cost, small form-factor portable readers. ThingMagic M7E-PICO's wide RF output range (0 dBm to +24 dBm) is important for the read/write requirements for RFID-enabled printers and tag commissioning stations.

ThingMagic M7E-PICO features a surface mount package designed for the efficiency of SMT manufacturing, driving down the total cost for embedding RFID in volume applications. It is ideal for handheld devices, consumables authentication, device configuration and access control.

ThingMagic M7E-PICO is supported by ThingMagic Mercury API.

Applications:

- Mobile Devices, including Printers, Handhelds, and Sensor Networks
- Tag Commissioning Stations
- Battery-operated devices
- Smartphone Accessories
- Medical Equipment for Healthcare and Pharmaceutical Industries
- Kiosks and Vending Machines
