

ACCESSORIES

Label Finishing with DTM Print

With label finishing solutions from DTM Print you can easily

**lamine, cut
and more**
with the DTM LF140e

**apply labels to
your product**
with the AP Series

**unwind and
rewind**
with the DTM Winder Series

LF140e

LABEL FINISHING SYSTEM

Made in Europe
With an extended
3-year warranty

Flexibility
Cut any size and shape
you like

Cut Speed
Max. 600 m/s (24"/s)
in all directions

Resistance
Lamination increases the
durability of labels

Digital on-demand label converting machine

The DTM LF140e is a compact, out of the box, finishing system that makes the converting process of your continuous label roll stock easier than ever. Unwinding, laminating, digital die-cutting, waste matrix removing, slitting and rewinding the finished rolls – all combined in a powerful machine which takes only minutes to set-up and run.

Unlike other systems the LF140e features optical black mark registration through an integrated camera and LED spotlight, which guarantees an accurate repetitive precision even with complex cuts.

In addition, the control unit of a large 11.6" touch screen really stands out. USB, Ethernet and also WLAN connectivity for accessing external cutting jobs is also included.

Keyfacts

- ▶ Open frame construction – easy media loading with an open front side
- ▶ Ultrasonic media tension control – means no moveable sensor parts to fail
- ▶ Camera sensing – more accuracy and speed in cutting
- ▶ Blank label production – converting blank stock into die-shaped rolls for printing afterwards
- ▶ Matrix pressure roller – to avoid media jam on complex matrix shapes by flattening the uptake material
- ▶ Remote assistance – if connected to the internet DTM Print offers online support and remote Firmware/Software upgrades

What's in the box ?

- ▶ Completely assembled and pre-installed LF140e
- ▶ Steel workbench with mounted rollers
- ▶ Instructions

Visit dtm-print.eu for detailed information.

LF140e

LABEL FINISHING SYSTEM

Waste Press Roll
Press roll reduces the inflation of the roll.

Matrix Removal

Liner Slitting
Can hold up to 6 blades to slit the web into finished rolls.

Rewinding

Solid Steel Bench on Wheels
45 mm x 45 mm x 1.5 mm welded frame with powder coating.

Industrial-Grade 11.6" Touch Screen
Windows 10 based with extended connectivity:
6 x USB 2.0/3.1, RJ-45 1 GB Ethernet and WLAN.

LED Spotlight

Digital Die-Cutting
With a maximum cutting speed of 600 mm/s and up to 450 gf cutting force for accurate results.

Laminating
Optional laminate film to protect your labels against harsh environments or applying specific surface structure as an extra finish.

Media Tension Control
Measures the outside diameter of the rolls and adjusts the web tension.

Roll Feed
Printed media requires an imprinted black mark (2 mm x 2 mm or 4 mm x 4 mm), unprinted media can be cut continuously.

Solid Wooden Desktop
Lower storage shelf made of 15 mm multilayer panel with block screen print.

Technical Specifications – Comparison Table

AP-Series

LABEL APPLICATORS

Compact Size
Fit on desks and
countertop

Models for
Flat and round
containers available

Application Speed
Up to 1,500 containers per hour

Label Range
Works with virtually any label
material including clear labels

Accurate labelling – quick and easy

Label applicators are a core component of labelling machines and systems in the packaging industry and help to increase your production throughput. They are also known as labelling units and are used to apply and dispense self-adhesive labels in many different applications. Product and identification labels are applied easily, straight and without wrinkles or folds in exactly the desired location, giving finished products a highly professional look.

It is well known that the better and more professional your labels look, the more you will sell. This includes, that labels are also accurately labelled.

With quick setup and easy operation, the AP-Series Label Applicators significantly increase the number of containers that can be labelled per hour versus manually applying labels. With their compact size they fit on most desks and countertops and are built with heavy-duty sheet metal and steel for long product life.

The AP-Series Label Applicators are the perfect accessories for virtually any roll-wound label including clear labels, no matter the printing technology.

AP362e in action at the Swiss brewery "Octopus"

Speed up your production and sell more of your products:

1. Insert the label roll and set the guides.
2. Place your container in the machine.
3. Pull the arm/press the footswitch and your label is applied.

What's in the box?

- ▶ Label applicator

AP-Series

LABEL APPLICATORS

AP550e Label Applicator for Flat Containers

Apply labels at speeds of up to 500 containers/hour.

Key facts

- ▶ For flat surfaces, such as rectangular or many tapered bottles, boxes, packages, bags, pouches, lids and more
- ▶ No air-pressure supply required (no expensive, noisy and maintenance-prone air compressors)
- ▶ LED display with built-in counter

Optional Modification

For all unevenly shaped or very small containers that would be difficult to hold during labelling, we recommend a customised holder. You can make this at home with the appropriate materials or use our expertise and experience. Do not hesitate to contact us about the right AP550e holder for your container.

With the built-in LED display users can easily set-up variable spacings, save up to nine different container offsets and see the number of applied labels.

AP360e/AP362e Label Applicator for Round Containers

Apply labels at speeds of up to 1200 containers/hour.

Key facts

- ▶ For cylindrical containers, including round bottles, cans, jars and tubes
- ▶ Built-in spring-loaded pressure arm applies labels firmly
- ▶ Securely affix labels even on very small radius containers such as lip balm tubes

AP360e is the base model, which applies single labels at a time.

AP362e is the advanced model and applies two different labels with variable spacing to a single container, perfect for alternating labels as used on e.g. wine bottles. A built-in LED counter and memory for up to nine front-to-back label offsets is also included.

AP380e Label Applicator with Liner Rewinder

Apply labels at speeds of up to 1500 containers/hour.

Key facts

- ▶ Built-in liner rewriter automatically rewinds the waste liner, keeping the production line clean and organised
- ▶ Enables two stop modes which stop the container either immediately or delayed after label application.

AP380e is 30% faster than previous models, includes all features of the AP362e as well as an integrated label rewriter.

We're all different and so are the products we want our labels to stick on. Therefore, don't hesitate to contact us for optional modifications on the AP-Series to make it fit your needs.

Technical Specifications – Comparison Table

AP 550e LABEL APPLICATOR

Number of Labels Dispensed per Trigger	1
Speed	Up to 500 containers per hour
Container Shape	Flat and many tapered
Container Diameter	0.05 mm - 203 mm (0.002" - 8")
Container Width	19 mm - 310 mm (0.75" - 12.2")*
Container Height	0.05 mm - 203 mm (0.002" - 8")**
Label Width	19 mm - 101.6 mm (0.75" - 4")
Label Height	19 mm - 152.4 mm (0.75" - 6")
Supply Roll	Up to 203 mm (8") OD with a 50.8 mm (2") to 76.2 mm (3") ID wound out, die-cut with waste removed, black mark or gap (clear labels require black mark)
Sensor Type	Optical sensor
Indicator Lights	LED display with built-in up/down counter and number of saved jobs
Controls	Mode, Recall/Reset, Up, Down
Power Requirements	100-240 V AC (50/60 Hz), 12 V DC, 5.0 A
Power Consumption	Idle: 4.2 W Average: 20 W
Certifications	UL, UL-C, CE, FCC Class A, RoHS, UKCA
Weight	10.9 kg
Dimensions (WxHxD)	305 mm x 541mm x 256 mm - 391 mm

DTM Winder Series

Winding Speed

User adjustable, up to 30 m/min

Roll Width

Up to 220 mm (8.66")

Automatic Stop

When end of roll or another interruption occurs

Winding Direction Switch

For either label inside or outside

Label winding made easy

Winders from DTM Print make it easy to un- and rewind large quantities of labels. Double your unwind capacity and no longer self-rewind the labels by hand.

Key facts

They're perfect for use with virtually any desktop label printer, no matter the printing technology. The DTM Label Winder Series includes the following models:

- ▶ DTM RW-4 Label Rewinder
- ▶ DTM RW-7/RW-7+ Label Rewinder
- ▶ DTM RW-8 Label Rewinder

The lateral guides of all **DTM Label Winders** guarantee an optimal parallel, tight and straight winding, which is essential for further processing, e.g. in a labelling unit. There's no need to work by hand anymore!

Load an up to 220 mm (8.66") wide roll and double your unwind capacity. Larger rolls typically have lower costs per label and save time as reloading cycle decreases.

Each RW-4, RW-7/RW-7+ and RW-8 works as an unwinder, too!

What's in the box?

- ▶ Label winder
- ▶ 1.5", 2" and 3" core adaptors (RW-4/RW-7/RW-7+ only)
- ▶ Instructions

Tape the printed output onto a core of your choice, drop the dancer arm and start your job. Your labels will be rewound with perfect alignment and just the right amount of tension for either hand application or on a label applicator.

The **DTM UW-4 Passive Label Unwinder** works non-electric and stand-alone.

It's the perfect accessory if you want to increase your unwind capacity with up to 114.3 mm (4.5") wide rolls.

DTM UW-4 Passive Label Unwinder in combination with DTM FX510e Foil Imprinter

RW-4 RW-7 RW-7+

LABEL REWINDER LABEL REWINDER LABEL REWINDER

With modular cores the RW-4 and RW-7/RW-7+ Label Rewinder from DTM Print are your flexible companions for a time-saving workflow.

Key facts

- ▶ Modular core adaptors
- ▶ Coloured LED indicator provides operation status
- ▶ Usable as rewinder and unwinder by easily switching from "Inside" to "Outside" mode
- ▶ Gummed dancer arm attracts dust and keeps it off your label surface
- ▶ User adjustable winding speed of up to 355 mm/s (14"/s)

Load a roll with a width of up to 178 mm (7") to the RW-7 or one with up to 120 mm (4.72") width to the RW-4, either wound-in or wound-out. The arm can hold a roll weight of up to 5 kg and with the core adaptors you're super flexible. Easily change from 1" cores (without adaptor) to 1.5", 2" or 3" cores.

Wound In/Label Inside

Wound Out/Label Outside

Need more width?

The RW-7+ Label Rewinder includes all features of RW-7 but with a 1" wider roll mount.

Load rolls with a width of up to 215 mm (8.46").

RW-8

LABEL REWINDER

The RW-8 Label Rewinder from DTM Print is your perfect accessory for heavy duty jobs. It offers support for heavy rolls with its solid metal construction.

Key facts

- ▶ Supports up to 250 mm (10") OD with a roll weight of up to 8 kg
- ▶ Control panel allows the user to set a speed limit and winding directions
- ▶ User adjustable winding speed of up to 500 mm/s (19.6"/s)
- ▶ L-shaped support arm enables the use of heavy and wide rolls
- ▶ Usable as rewinder and unwinder by easily switching from "Face-In" to "Face-Out" mode

Control Panel

L-shaped support arm

The RW-8 Label Rewinder complements the DTM Winder Series in the upper range for up to 220 mm wide rolls. For heavy and very wide rolls an L-shaped support arm is included, which can be mounted in seconds if required.

Technical Specifications – Comparison Table

	RW-4 LABEL REWINDER	RW-7 LABEL REWINDER	RW-7+ LABEL REWINDER
Winding Speed	Up to 355 mm/s (14"/s)

Manufacturer	DTM Print GmbH		

Important Note: Pliability/flexibility/rigidity of the label is an important factor for the smooth transport of the label rolls in the rewinder. If the label is too flexible, no matter the thickness, it can cause uneven winding, slipping or stopping of the rewinder. Polypropylene, polyester and vinyl labels tend to be more flexible than paper labels. If you suspect the label stock is too flexible, it is recommended that the stock is tested on the rewinder before making any purchase decisions of label stock or the rewinder. Genuine DTM Label Stock substrates do not slip or cause any damage.

Simplified Labelling Process

Traditional Process:

1. Design your label
2. Place an order
3. Proof and change label
4. Wait for delivery
5. Stock all of your different product labels
6. Apply labels
7. Throw away unused labels

Process with DTM Print:

1. Design your label
2. Print on-demand
3. Apply labels

Your design on Mac or Windows

Print your full-colour labels on-demand

Your advantages:

- ▶ High resolution full-colour labels
- ▶ Only print the number of labels you need; with no minimum quantities
- ▶ Skip delivery times and extra stock costs for different label layouts
- ▶ No wastage of labels after product label changes
- ▶ Print graphics, photos, text and barcodes

Print & design your label:

- ▶ You are free to choose any design program you prefer
- ▶ Print your labels directly from your design program
- ▶ Use label design applications like NiceLabel or BarTender to take advantage of extra features, such as modified templates, variable data and any barcode type

Your printed labels

Apply your labels semi-automatically

Fast and easy:

- ▶ Set the guides
- ▶ Place your container in the machine
- ▶ Press footswitch or pull the arm and your label is applied

Your labelled products

LOOKING FOR LABEL PRINTERS?

We're happy to find the best labelling solution for you and your business!
