RAM® MOUNTS
Material Handling

Welcome to the

CONNECTED WAREHOUSE

For over 30 years, RAM® Mounts has collaborated with the industry's best innovators to build the future of mobility. The key to a mobile workforce combines device, software, and docking solution. That's why we created the Connected Warehouse—a commitment to making the most reliable and affordable device mounts, paired with the best solutions providers in the world. Every day our engineering teams look for ways to optimize product performance to seamlessly integrate into one another, making the lives of workers worldwide easier.

CONNECTED
W A R E H O U S E

Device

Every journey starts with a device. With it, the new age of the connected worker is possible.

How it Works: RAM® Mounts

Double Ball Mounts

Choose from a selection of holders, socket arms and ball bases to build a custom mount for your specific needs. Additional bases may be chosen so that your mount can support multiple devices, or can be transferred to alternate mounting locations.

1
CHOOSE A BASE
Select from a variety of bases to secure your device exactly where you need it

2
CHOOSE AN ARM
Select an arm based on your desired length and placement

3
CHOOSE AN ADAPTER
Select an adapter based on the weight of your device and holder
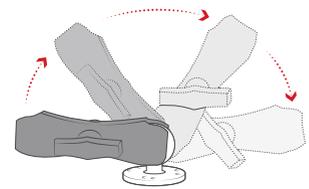

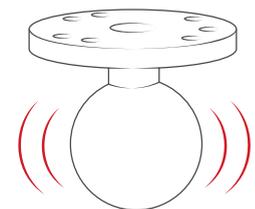

4
CHOOSE A HOLDER
RAM® offers a wide selection of holders for your specific device

Easily adjustable

Double ball and socket technology allows for near-infinite adjustability

2-Hole AMPS
Intended for small devices and light duty environments
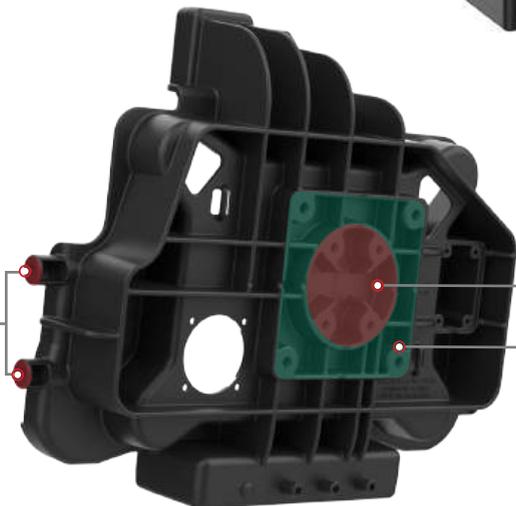

4-Hole AMPS & VESA Pattern
Intended for large devices and heavy duty environments

Rubber casing absorbs shock and damps vibration

Bases

Each ball size in the RAM® Mounts rubber ball and socket system supports a different amount of weight and withstands increasingly intense vibration. Use the examples below to determine the ideal size for your system based on your device weight and application.

B SIZE
- 1" diameter ball
- Holds up to 1 lb
- Ideal for cup holders, cameras, phones, and other lightweight devices

C SIZE
- 1.5" diameter ball
- Holds up to 3 lbs
- Ideal for tablets, 2D barcode scanners, & lightweight laptops

D SIZE
- 2.25" diameter ball
- Holds up to 5 lbs
- Ideal for vehicle-mounted computers and rugged laptops in moderate vibration environments

E SIZE
- 3.38" diameter ball
- Holds up to 10 lbs
- Ideal for vehicle-mounted computers and rugged laptops in extreme vibration environments

Socket Arms

RAM® Mounts feature a double ball and socket system that provides modularity and adjustability. The RAM® arm connects the mounting base and your device. Arms are available in various sizes and lengths—make sure to shop within your intended size ecosystem.

B SIZE 1"

PART NUMBER	OVERALL LENGTH	SOCKET TO SOCKET
RAM-B-201U-A	2.42"	1.75"
RAM-B-201U	3.73"	3.00"

GDS® Uni-Conn™

GDS® Uni-Conn™ is a universal, snap-in docking system that eliminates the need for expensive device upgrades. With just an IntelliSkin®-wrapped device and a GDS® Uni-Conn™ adapter, you're ready to connect seamlessly. This system not only streamlines the upgrade process but also makes docking effortless. When it's time for your next device upgrade, remember: there's only **One Dock to Connect Them All™**.

GDS® UNI-CONN™ ADAPTERS FOR INTELLISKIN®

Unlock the potential of GDS® Uni-Conn™ by installing the adjustable button adapter (RAM-GDS-U1AU) or standard adapter (RAM-GDS-U1U) to the back of your IntelliSkin®.

SEAMLESS DEVICE UPGRADES FOR THE FUTURE

Each IntelliSkin® is designed with the alignment point at the same height to connect with one universal docking station. When the time comes to upgrade devices in your fleet, a new IntelliSkin® is all that is needed. *Note: failure to install dock lever stop will void warranty.*

SPRING LOADED FOR BACKWARDS COMPATIBILITY

For most IntelliSkin®-wrapped tablets outside of the listed compatible devices, a spring loaded version of the GDS® Uni-Conn™ dock is available so you can implement this solution ahead of your next device upgrade.

Temperature Control

Located at the back of your dock is an empty housing for upgrading your mounting solution. This housing can accommodate various temperature modules provided by RAM® Mounts. Easily install either the RAM® Vent-Temp™, which connects to your vehicle's A/C vents or the RAM® Temp-Right™, which provides regulated heat in extremely cold environments.

RAM® VENT-TEMP™ BACK NOZZLE ATTACHMENT

Vent cover attaches directly to circular vents using zip ties

Hose includes built-in magnets for easy breakaway when not in use

RAM-GDS-HS4MU
GDS® Magnetic Hand Strap for Phones with IntelliSkin® or RAM® Skin™
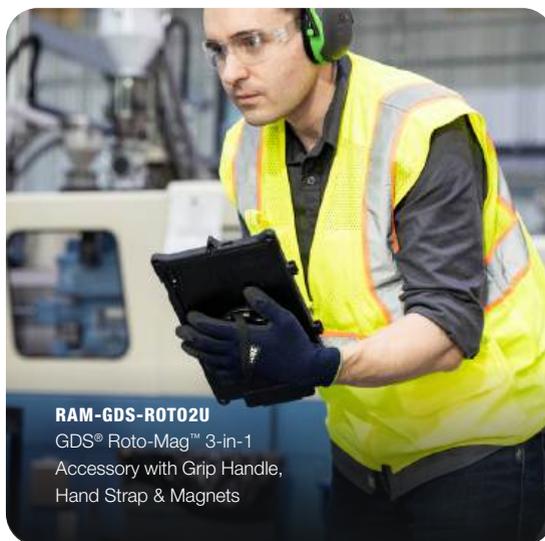

RAM® vs. GDS®

RAM® Docks™

For Closed-Cockpit, Clean, & Low-Impact Environments

While all RAM® products are rugged and reliable, OEM device ports vary in their ability to maintain a clean, reliable connection. With this consideration in mind, mounting a device without an IntelliSkin® is generally recommended in static or closed cockpit environments that are less likely to collect dirt or debris.

AVAILABLE FEATURES IN RAM® & GDS®

- Locking & Non-Locking
- Single & Dual Peripheral Support
- Ethernet Connectivity
- Temp Control Accessories
- Heated Pogo Pins
- NFC Extender
- DB9 Connector

DEVICE STAYS DOCKED

Frequent insertion and removal can stress docking contacts, so if you plan to keep your device docked long-term, RAM® Docks are ideal.

LOW-PROFILE VEHICLE DOCKS

RAM® offers low-profile docks for the Samsung Tab Active5, ensuring full functionality while docked.

SMALL SCALE & SHORT TERM

A single RAM® Powered Dock is more cost-effective than a GDS® Dock™ with IntelliSkin®, but upgrading your device might require a new docking station, potentially increasing costs over time.

CHARGERS

GDS® Docks™

For Open, Dirty, & Harsh Environments

In dirty, rough environments, interrupted device connection is unavoidable. This is mainly due to the lack of cleaning maintenance and excessive debris buildup. The pogo pad contacts on the bottom of the IntelliSkin® are intentionally flat to reduce the debris buildup, making it easy to clean.

DEVICE MOVES FREQUENTLY

IntelliSkin®'s protective pogo pads enable frequent docking and undocking while keeping your device safe, so with GDS® accessories, your team can use and store the device confidently.

VEHICLE, DESKTOP, & MASS CHARGING DOCKS

GDS® Docks™ provide various solutions for moving devices between locations, including the rugged GDS® Tough-Dock™, universal Uni-Conn™, and multiple Desktop Docks.

LARGE SCALE & LONG TERM

GDS® Ecosystem™ costs more upfront than a RAM® dock but offers scalability and better protection, making it a cost-effective long-term investment.

Brands

RAM® Mounts partners with trusted device manufacturers to enable an effective and cost-efficient enterprise workflow with our rugged mounting solutions. From form-fit RAM® docks to the universal GDS® Ecosystem™, learn which brands we support and how you can keep your fleet of devices connected, protected, and charged.

Honeywell

NOTE: RAM® Form-Fit Docks are only recommended for closed cockpits or clean environments with infrequent device docking and undocking. For environments with high vibration, dirt, debris, or highly mobile workers who are frequently docking and undocking their devices, IntelliSkin® with GDS® is recommended.
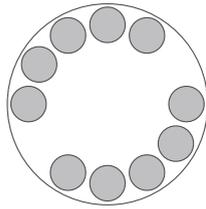

Magnetic Mounts

Quickly move the location of your device mount and opt out of time-consuming installations with our line of heavy-duty magnetic mounting solutions. These bases securely attach to any ferrous surface—popular locations include forklift posts, vehicle sides, machinery, work benches, and more! Explore our recommended bundles for smaller, more compact devices and larger, heavier tablet solutions.

OPTIMIZE WAREHOUSE EFFICIENCY WITH FIXED-MOUNT DEVICES

Wearable or fixed-mount devices play a crucial role in optimizing operations within packing and staging areas. By facilitating the automation of high-volume processes, these devices significantly minimize the need for manual inspections. This leads to enhanced productivity and improved accuracy, allowing workers to focus on more complex tasks while ensuring that quality standards are consistently met.

Wolfram Manufacturing Implements Solutions for Future-Ready Operations

Wolfram Manufacturing, a 30,000-square-foot machine shop in Austin, Texas, specializes in high-volume metal part production using its own advanced technology. In addition to running a full production shop, they offer CNC machine monitoring software and Caron Engineering products like TMAC to optimize machine shops.

Wolfram approached RAM® Mounts to develop solutions for two monitoring systems: machine performance and horsepower. Both required heavy-duty monitors and fixed tablets with adjustable viewing angles, as the existing hardware lacked flexibility. RAM® Mounts solved the issue by integrating robust drill-down double ball mounts with VESA plated adapters and iPad mini 6 EZ-Roll'r™ cradles. This setup enhanced access and flexibility, enabling operators to efficiently implement the new monitoring systems.

Georgia-Pacific Keeps One Eye on Tomorrow

Georgia-Pacific is one of the world's leading manufacturers of paper and forest products. Since 1927, they have been growing, expanding, and perfecting the art of life's simple necessities. With over 150 facilities & 30,000 people directly employed, they rely on a cohesive technology ecosystem to keep their business running smoothly. So when they outgrew their Microsoft ecosystem, they knew it was time to invest in a custom solution from Samsung, Zebra, & Abetech that would scale alongside them.

After deciding on Samsung's Tab Active product line, Zebra's Ultra-Rugged Scanners, & Abetech's Mobile Device Management software, they reached out to 3Eye & RAM® to keep their new devices safe both physically and financially with a future-proof solution.

About RAM® Mounts

RAM® Mounts manufactures rugged and versatile mounting systems for phones, tablets, and other mobile devices that can be attached nearly anywhere. Unlike other mounts on the market, RAM® allows you to secure devices where you need them most. The unique design of the RAM® Mounts system provides quick installation, adjustability, strength, vibration damping, and durability—all at a low cost. Backed by a lifetime warranty, RAM® uses powder-coated, marine-grade aluminum with lightweight and high-strength composites, stainless steel hardware, and rubber balls.

THE RAM® DIFFERENCE

PREMIUM DESIGN

The rubber ball and socket design of our mounting systems offers a secure hold, with near-infinite adjustability and vibration damping for the most demanding environments. With thousands of components trusted by users around the world, we've been able to design and develop mounting solutions that consumers and companies previously only dreamed were possible.

CUSTOMIZABLE

Take your phone mount from your truck to your boat, or mix and match components to create your ideal mount. Because of the modularity of the RAM® system, you can customize your solution to fit your specific needs in almost any application.
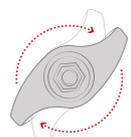

QUALITY MATERIALS

A premium design deserves the highest quality materials available, from rubber and stainless steel to high-strength composites and marine-grade aluminum. Our facilities— including powder coating, die casting, rubber injection molding, and shock and vibration testing—help us deliver on this promise to bring you inventive mounting solutions.

LIFETIME WARRANTY

It's simple. Our reputation as the leader of premier mounting systems means if we build it, then we guarantee it. We're confident in the quality of our products, and with our warranty, you can be too.

*1-3 year warranty on electronics, including powered docks

NATIONAL PRODUCTS INC. (NPI)

Introduced in 1990, National Products Inc. (NPI) quickly became the leading manufacturer of rugged and versatile mounting solutions. RAM® Mounts has grown to offer approximately 5,000 modular components—the most innovative product line of its kind for nearly any application and device, including phones, tablets, GPS systems, laptops, marine electronics, printers, radios, and much more.

In addition to RAM® Mounts, NPI is also the creator of award-winning IntelliSkin® sleeves and GDS® Technology™ products. IntelliSkin® sleeves ruggedize a wide range of consumer phones and tablets, while the GDS® Ecosystem™ provides users the ability to securely charge, dock, and sync devices in the most demanding environments.

NPI is proudly located in Seattle, Washington in the same neighborhood where the company was started.

PARTNER WITH RAM® MOUNTS

Here at RAM® Mounts, we believe that unfathomable things are possible with ingenuity. With a portfolio of more than 5,000 SKUs paired with innovative engineers and in-house product experts, we have the tools and expertise needed to create solutions that you didn't know were possible. We have the ability to solve your mounting challenges quickly, efficiently, and cost effectively.
