RedBeam RFID Asset Tracking

Intuitive, affordable, complete data collection solutions!

RFID asset tracking made easy!

RedBeam makes asset tracking easy with RFID! Track computers, equipment, furniture, vehicles, and other valuable assets with this comprehensive fixed asset tracking application and powerful RFID (Radio Frequency Identification) technology.

RedBeam RFID Asset Tracking is a practical application allowing for data collection using RFID-enabled mobile computers, eliminating the need for line-of-site barcode scanning.

Tag your fixed assets such as computers, printers and furniture. RedBeam RFID Asset Tracking is designed to utilize passive RFID tags that require no internal power supply. The tags receive incoming radio frequency signals emitted by a mobile computer with RFID tag reader. The incoming radio signals energize the tag, causing the tag to transmit its identification data back to the mobile computer.

Streamline your fixed asset tracking process by eliminating the need for line-of-sight scanning. Use the RFID asset tracking software to conduct physical inventories by easily adding all of your asset data to the mobile scanner with one click on the sync button. As you go from room to room, the RFID reader interrogates the tag on each asset. Update any information including location, serial #, asset custodian, status, purchasing info or IT related fields.

Print detailed reports of your RFID asset tracking activities. Report on found and missing assets, asset history, asset value and depreciation, warranty and lease expiration and more.

RedBeam Asset Tracking is used by a wide variety of organizations, including state, local, and federal government agencies, single site and multi-site companies, and other entities that need to track assets and capital equipment.

RedBeam makes it easier than ever to keep asset records up to date. Whether you have 500 or 50,000 assets, RedBeam RFID Asset Tracking is the solution you are looking for!

RedBeam RFID Asset Tracking

Supported Mobile Devices

RedBeam supports a variety of enterprise level mobile devices to provide you with the tools needed to streamline tasks, improve productivity, and maximize investment protection.

For a complete list of compatible mobile devices visit:
www.redbeam.com/products/scanners.php

System Requirements

- Windows XP, 2003, Vista, Windows 7
- Pentium IV or Greater Processor
- 512 MB RAM, 1 Gig Free Hard Disk Space
- Microsoft ActivSync Software or Windows Mobile Device Center (Free Download)
- Microsoft SQL Server 2000, 2005, or 2008 (if more than 10 concurrent licenses)
- Compatible Printer Hardware (any laser or dedicated barcode label printer that uses Windows drivers)

Key System Features Include:

- Easy-to-Use PC Interface
- Room and Asset Barcode Label Printing
- Flexible User Defined Fields
- Intuitive Mobile Computer Screens
- Ability to Add Attachments & Maintenance Records
- Robust Reporting with Scope and Sort Capabilities
- Purchasing History and Depreciation Calculations
- Import and Export with Microsoft® Excel
- Role-Based User Security
- Robust SQL Database
- Single or Multi-User Network Versions

Benefits:

The system is designed to:
- Speed Up Asset Tracking Process
- Improve Accuracy
- Track IT Related Information
- Monitor Warranty and Lease Expiration
- Maintain Insurance Records
- Comply with Government Regulations
- Meet Audit Requirements
- Improve Depreciation Reporting
- Minimize Paper Work
- Create One Central Asset Repository
- Keep History of Asset Use
